

Year 6

Autumn Term 2

2024

Commando Joes

Computing

The Year 6 children are excellent at coding now so they are ready to problem solve with codes. They were given a code that was not working as it should and were able to 'debug' the code.

PE

The children have been practising their rugby skills combined with some indoor circuit training this half term.

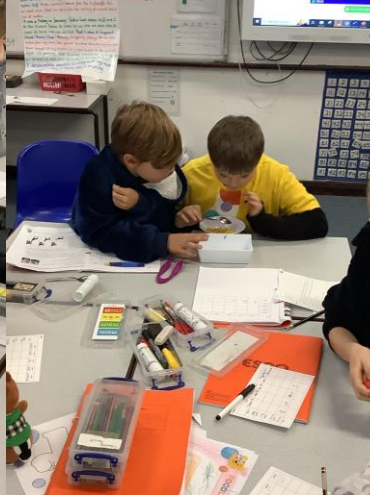

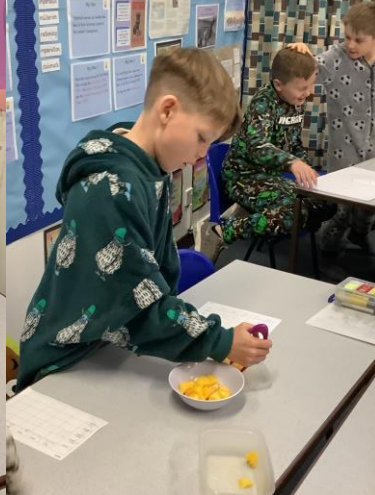

Snow fun

The children enjoyed working together to make their own snow people on the school field.

Science

The children have investigated how bird beaks contributed to natural selection linked to how easy it is for birds with different shaped beaks to eat the available food.

Design Technology

Make do and mend...
The children have
learned a variety of
different stitches in
their design
technology work.
Threading the needle
was the first
challenge to
overcome, but their
mastery of the
different stitches
meant they could
produce some great
pieces of work.

History

Year 6 have been learning about World War I and created a timeline of the significant moments of the war, researching to add the information to the cards.
