

Year 1

Autumn Term 2

2024

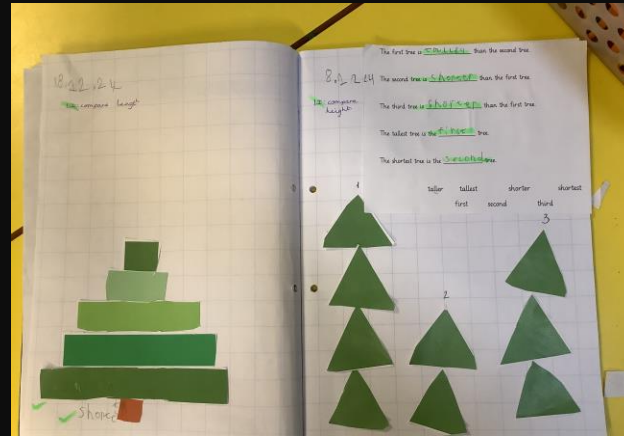

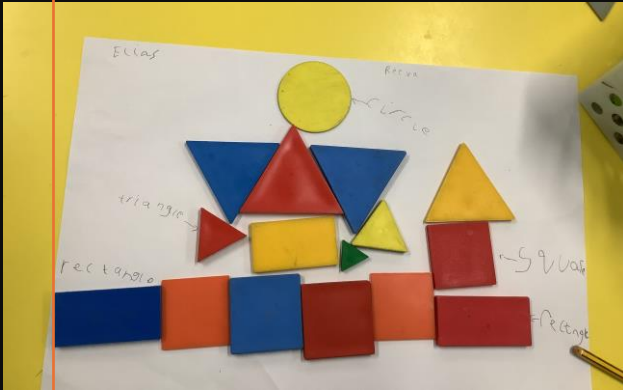

Christingle Workshop

Every child in Year 1 learned about the meaning behind each part of a Christingle: the orange, candle, red tape, four cocktail sticks and dried fruit.

Reverend Jonathan popped in to visit and find out what the children had learned. He was very impressed with how well the children could explain the different symbols within their Christingle.

Learning about shapes

In maths, the children have been learning about the properties of shapes and using them in creative ways.

They have named the shapes and used them to create pictures.

They have built their own shapes with natural materials.

They have compared different trees using mathematical vocabulary such as 'shortest' and 'tallest' as well as ordinal numbers.

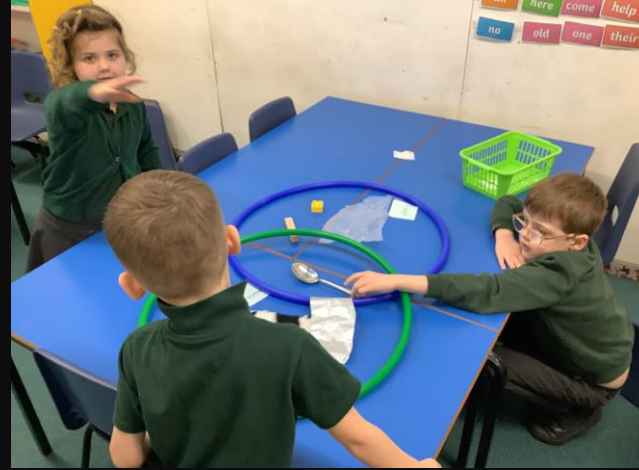

The Very Hungry Caterpillar

In Year 1, the children thought about the story 'The Very Hungry Caterpillar', and really enjoyed visiting the theatre in Leamington to watch it performed with puppets.

For some children it was the first time they had visited a theatre, and they were fabulous ambassadors for school.

Properties of materials

In science, the children have thought about different properties of materials and sorted them carefully thinking about which were flexible, rough, smooth, rigid etc.

Village Walk

In geography, the children walked around the village following a map and looking out for different features. They noticed so many different things – some of them spotted features they hadn't noticed before.

All of the children walked so sensibly and were great ambassadors for the school.
