

Reception

Spring Term 1

2025

Welcome Mrs. Guilford

This term we welcomed Mrs
Guilford as our Reception class
teacher.

Large Scale Construction

Reception children have enjoyed building aeroplanes and a carwash tunnel with the large-scale construction materials. It was great to see the children working together and problem-solving as a team.

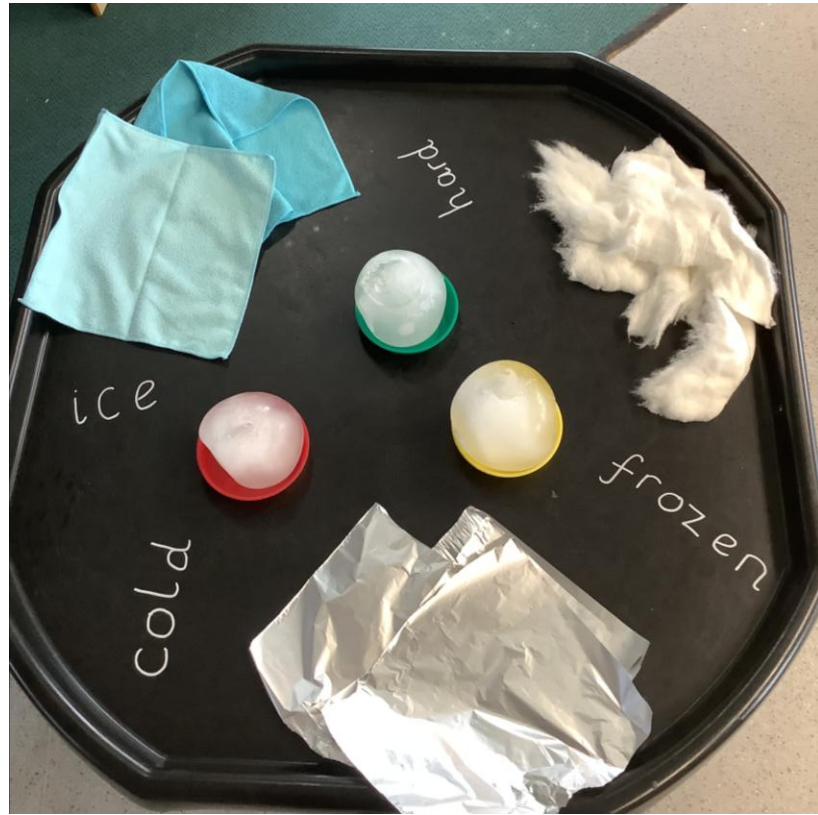

Role Play

As part of their learning about different countries around the world, and to celebrate Chinese New Year, the children had the opportunity to explore a Chinese Restaurant in the classroom. They played all of the different roles required and enjoyed some delicious meals.

How can we stop the ice from melting?

The children worked together to explore different materials. They discovered which material helped to protect the ice from melting best. They used some fabulous words to talk about what they were planning, and what was happening. Which material do you think was the best insulator?
