

Year 1

Spring Term 1

2025

Creating our Geography display

The children in both Year 1 classes created their own classroom display linked to their geography work, thinking about how can look after our world.

Finding shapes outside

Year 1 took their maths learning outside and took photos of shapes they found. They found lots of different circles, along with some other shapes too.

Bonds to 20

The Year 1 children were excited to be allowed to write on the tables when they found pairs of numbers that made 20. They used the tens frames to help them to prove their answers were correct. They also used numicon to find other ways to make 20.

Sorting materials

Investigating properties of materials

Year 1 were challenged to design some bunting that would be suitable to be used outside. They needed to find the best material to use if it rained. What material do you think was best suited for a rainy day?

Our Amazing Bodies

The Year 1 children painted some of the things their amazing bodies could do. What would you paint?
