One night I went down stairs to get some food. When I opened the fridge, three witches popped out. I shouted "What are you doing in my fridge?" Then the witches pulled me in the fridge. Soon I was in a magic library, soon I looked back and the three witches disappeared. I pushed I pushed when I pushed the door a gush of wind pushed me back. Then I found a button and it was just a dream. That night I never slept again!

7.5.25  
 A Surprise.

At night I tiptoed down stairs. Nobody was around I went to the kitchen and with out a sound I opened the fridge door and out popped a small monster. I said "Who are you eating all the food?" The monster said "Erm..." "You can talk!" "Yes I can talk!" The monster was cold as he leaped on the table. I jumped out of the way. I was so confused. The monster ran away and I went after him "Come back!" "No!" I chased the monster out side and over the hills. With out a sound I saw him go in a cave. With a cheeky grin I followed him in. He looked back but I hid behind a rock just in time. I saw him talk to a giant monster king. "King may I speak?" "Yes you may." "King you see a person save me but I am afraid." "Good."

"But you must do you know what?"  
 "Ok." So I ran because I knew what he meant. I ran back to my house and went back to sleep. The next day I was still alive, maybe it was a dream. I went down stairs and opened the fridge, maybe it wasn't a dream I heard a knock on the door then I ran up stairs and hid under my covers. Next I looked out the window, I saw the monster then I hid under my bed and called police and monster control. I whispered please I should be safe. then I saw the police and the monster control and they got the monster and I never saw a monster again in my fridge.

Amazing!

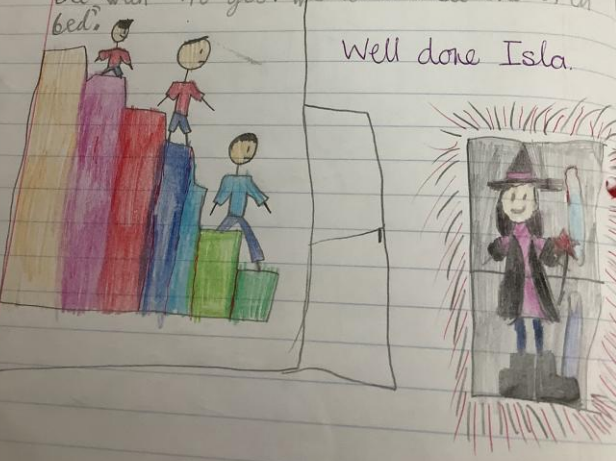

7.5.25 A Surprise

One dark gloomy night I tiptoed down stairs I opened my oven and a wicked witch hopped out of my oven. I said "Hello who are you?" The wicked witch replied "Hello I'm the wicked witch of Oz, and you are?" "I'm Mary, I'm charity, and this is Cory." "Are you all brothers?" asked the witch. "No yes! We all are but one is in bed."

Well done Isla.

In Science we have been learning about plants...

Emily Boiko

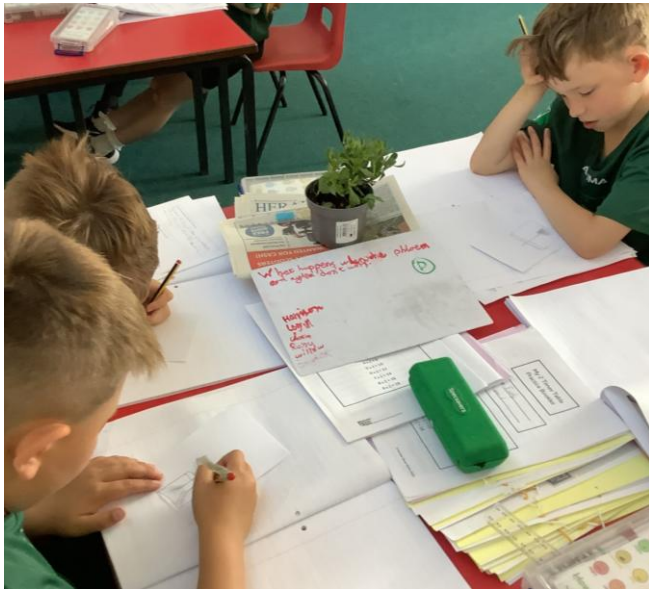

**Seed**  
Firstly, you buy a packet of seeds or a gull grows plant drops them in to the soil. If you had brought them from a shop you dig-up a hole and put the seeds in. After that the seeds get watered. Either by a watering can or by rain.

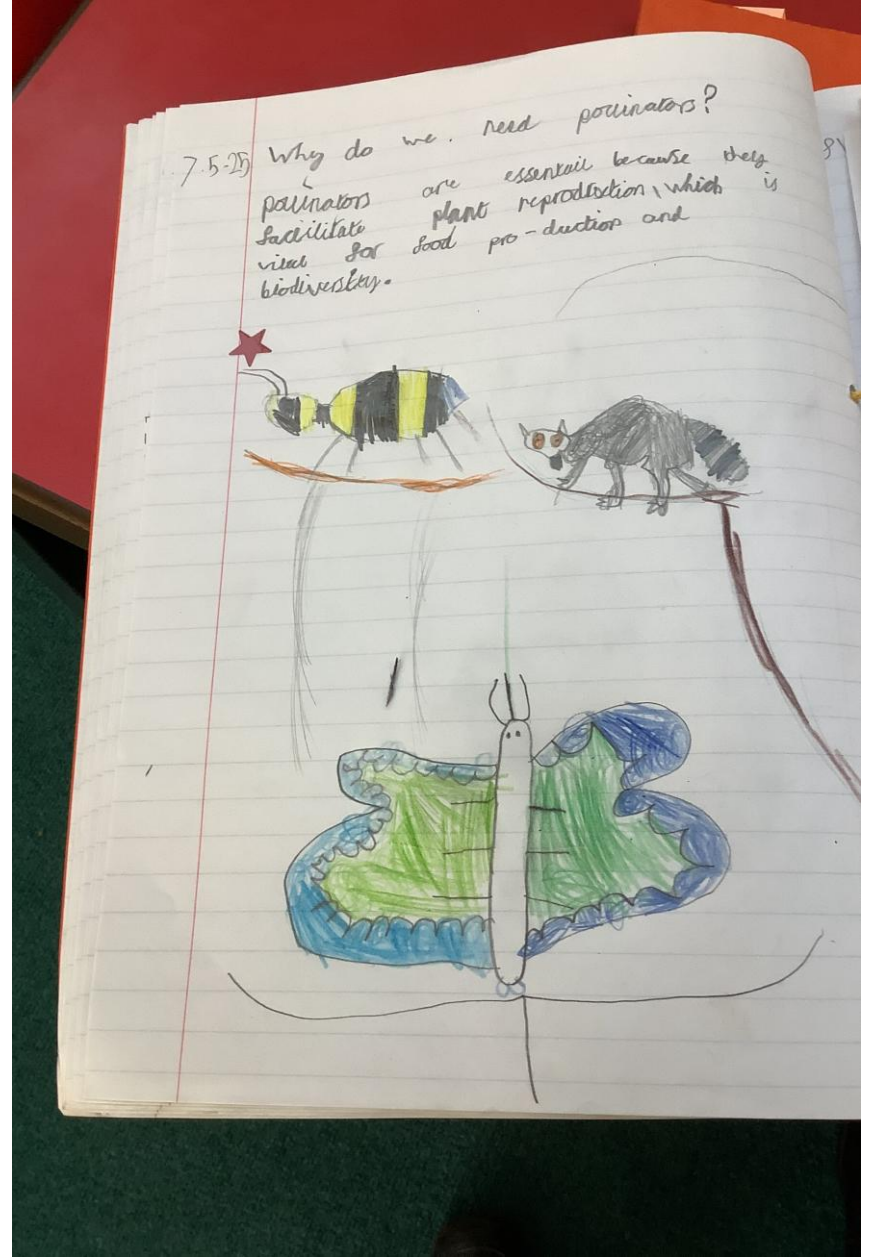

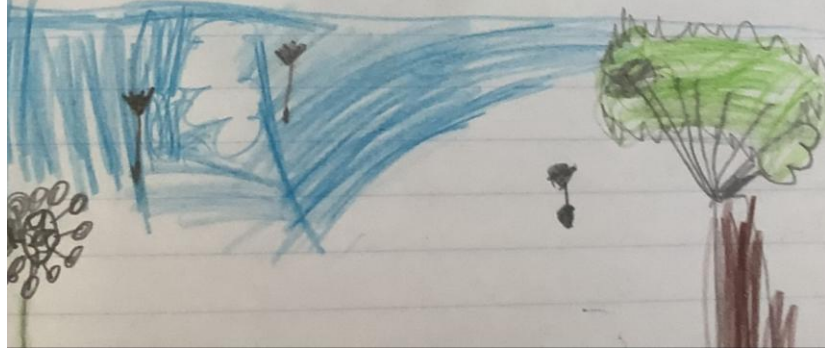

**Seedling**  
Then the roots grow. After a few weeks a little green stalk will grow it is called a seedling. Soon it grows little leaves.

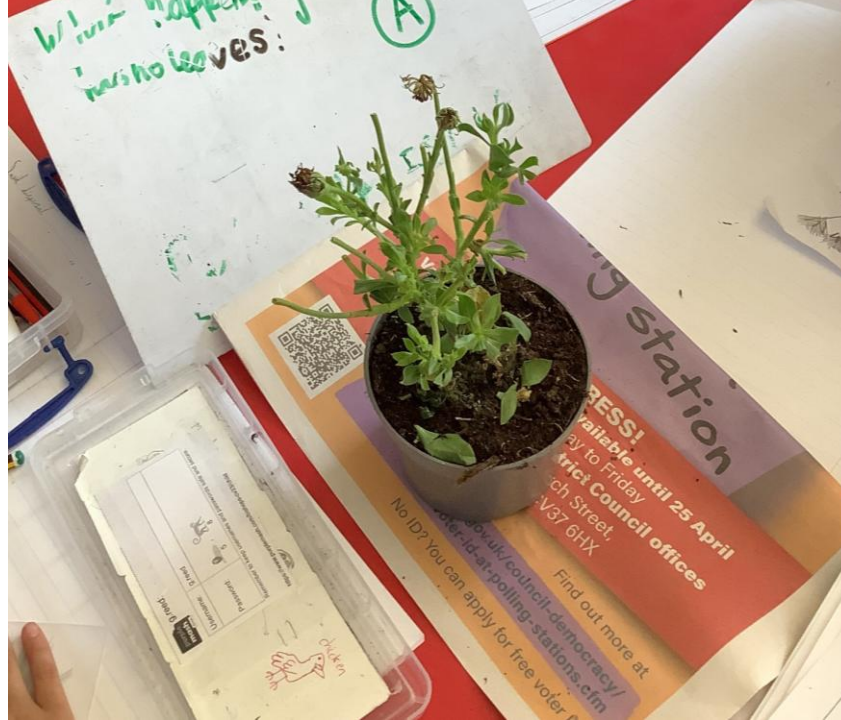

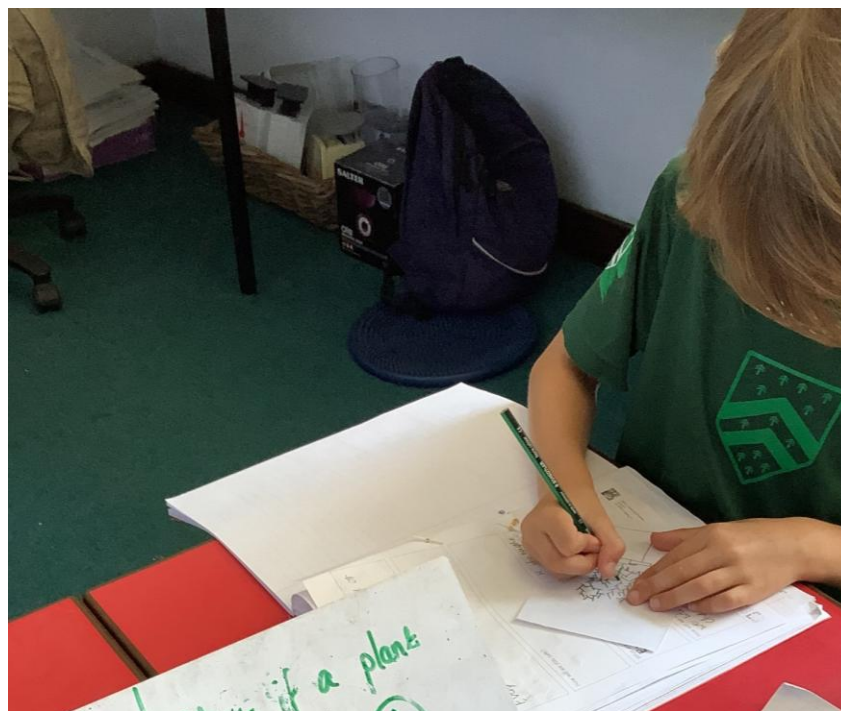

**young plant**  
Next the roots will grow bigger to anchor the plant into the soil when it is bigger. Then the plant will grow bigger

125 Seeds are dispersed by <sup>the</sup> wind because it blows the seeds blowing and spreading them into the rocks and crevices. Some seeds are dispersed by animals going dog, cats and rat because they go in bushes and all seeds go's all over there. Some plants are dispersed by explosion because people squeeze them which makes them explode. Some plants are dispersed by water because they the water carries them to land and they grow. Some plants are dispersed by people because we blow dandelions. And some plants are dispersed by birds because when birds land on trees all seeds drop all over them.

2. Choose **four** different flowers. Complete the tables to compare the number of parts in each flower.

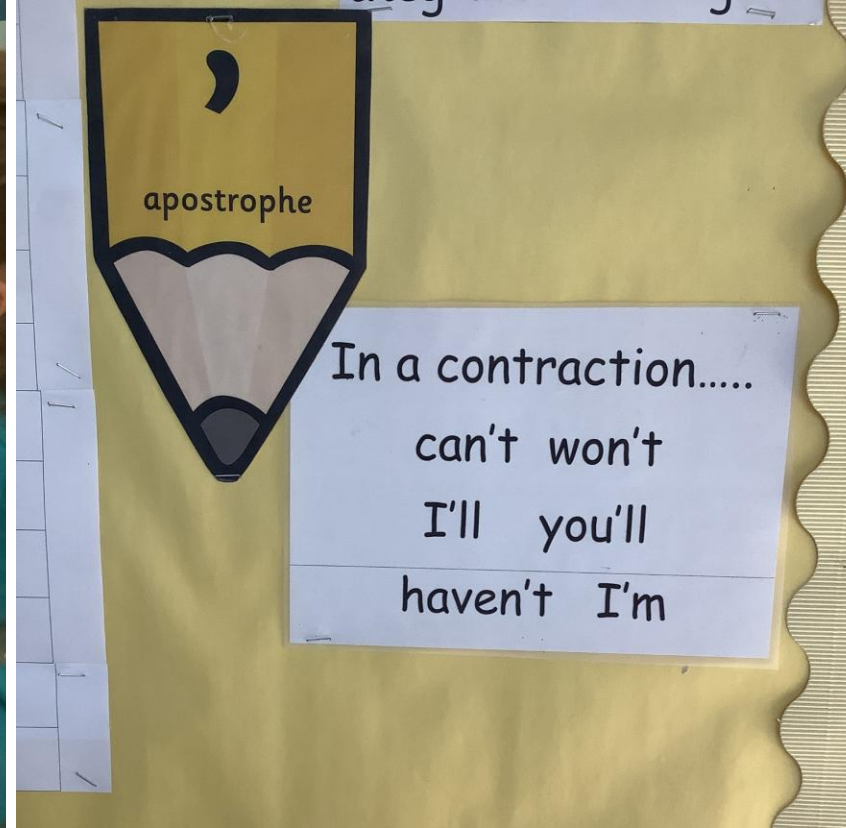

flower one Marigold May flower two daisy

Flower part	Number of parts	Flower part	Number of parts
carpel	1	carpel	0
petal	5	petal	30
sepal	5	sepal	15
stamen	21	stamen	120
