

Year 3

Summer 2

Commando Joe missions

We are getting really good at working as a team to solve problems now!

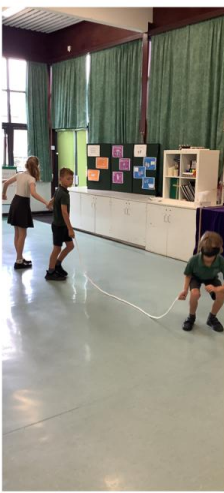

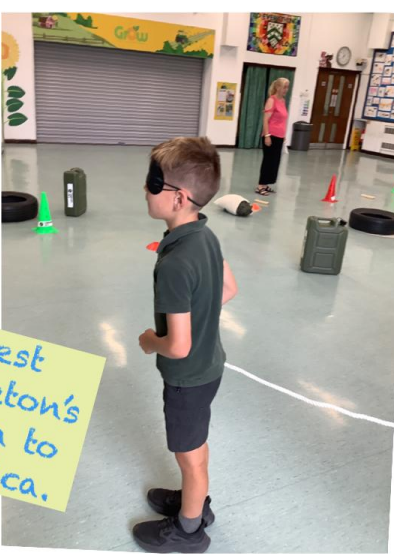

Making boats that float in Commando Joe's.

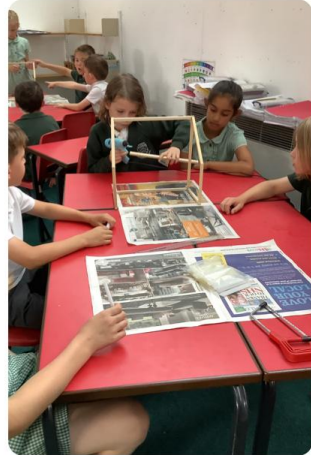

PIC•COLLAGE

Ernest Shackleton's mission to Antarctica.

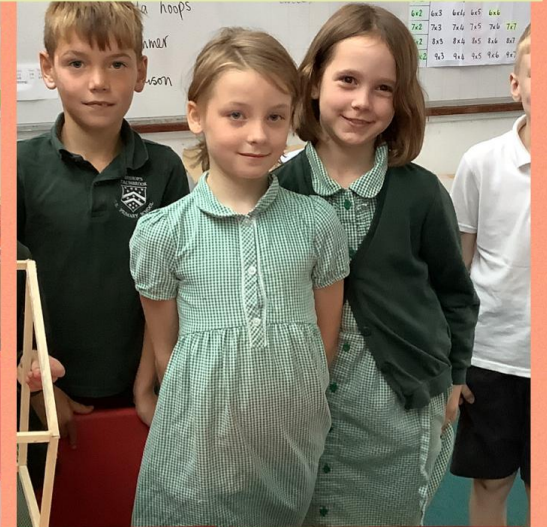

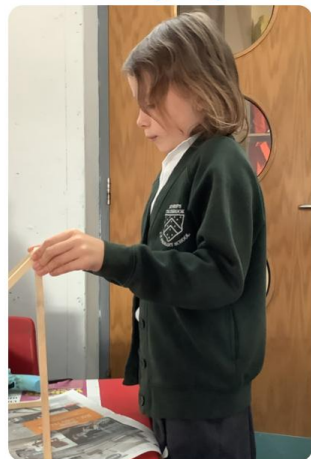

PIC•COLLAGE

Completing the greenhouses in DT.

Learning how to make joints and use a glue gun to make a greenhouse structure.

Thank you for my letter I was
So happy to hear from you.

I felt happy when I opened the
envelope.

I heard about the family so come
over to my house I do live in a
concrete jungle. But there might be
somewhere to plant seeds??

I will get up each morning and
and happily ^{happy} bake with you
and you will help me bake
and we will make a team

Thank you for my letter I was
So happy to hear from you.

I felt happy when I opened the
envelope.

I heard about the family so come
over to my house I do live in a
concrete jungle. But there might be
somewhere to plant seeds??

I will get up each morning and
and happily ^{happy} bake with you
and you will help me bake
and we will make a team

you think things will get better
(in our family?)

Story
planning
based on a
story called
'The
gardener'.

Two things I have learned while
here are: it doesn't matter how
bake it, it will bake well if it
is good. It is okay if you're alone, if
you have someone with you, you can see
Did you know that you can get
that and healthy and unhealthy?
same time?

I can't wait for you to come so

Volcanologist's report

Fill in the report about your chosen volcano.

Name of volcano Paricutin

Location Mexico

Date of significant eruption 1943-1952

Status extinct

Image of volcano

Summary of the eruption

Some people heard rumbling for weeks but thought it was the noise of thunder. On 20th February 1943, a volcano had its first eruption near the village. The volcano was soon after named Paricutin. A farmer called Dionisio ^{hugo} ~~alido~~ was working on a field and saw a huge crack on the hill.

Consequences for people

No one was killed by lava or ash from the volcano but three people were killed by lightning. People can't breathe with all this smog.

Consequences for the landscape

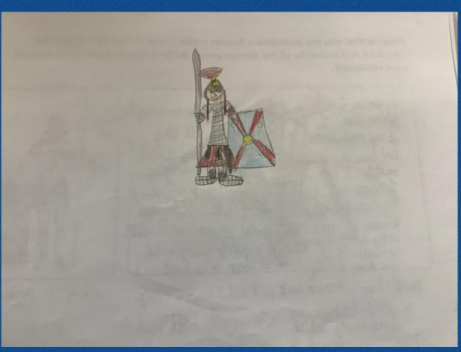

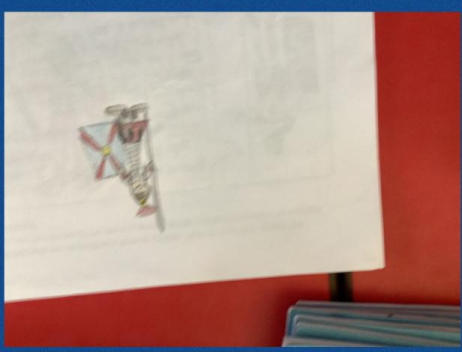

Most plants were destroyed within a few kilometres around of the crater around the volcano. The trees will burn. The grass will burn.

PIC-COLLAGE

In Geography Year 3 have looked at volcanoes around the world and why they happen.

Working with a partner to read Roman information.

Life as a Roman soldier

Lucy 10/6/23

Imagine that you are an ordinary Roman soldier. How do you feel about the structure and hierarchy of the Roman army? Write in the first person to explain your viewpoint.

I am a Roman soldier and I will always follow the 5 rules I will stay at my post I will not steal from the army I will not leave my weapons I will not run away from battle I will die for Rome, if I had to, I would wake up early and get dressed ready to practice for battle I have to work and work for 25 years then I can stop and have enough money to have a land of my own I would have metal armor and work for miles I would not be allowed to stop even though my feet was hurting

Imagine that you are an ordinary Roman soldier. How do you feel about the structure and hierarchy of the Roman army? Write in the first person to explain your viewpoint.

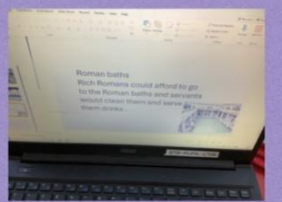

I am a Roman soldier and I wear a helmet and a cloak. There are 5 rules, I will stay at my post. I will not steal from the army. I will not leave my weapons. I will not run away from battle. I will die for Rome. I have to work for twenty five years and if I get killed it is ok because if I have to I will. I have to carry a metal armour that is very heavy and I had to carry a heavy boot pack on my back.

Salute mama and papa XXX.VI.XXV
 It has been so hard being in the army because you have to do lots of battaling against the scotish people and let me let you into a little secrete it is not easy Fighting against scotish people and when you are not fighting you are practurcing your march or your battie. When we have done all the marching and batterling you come back to the fort and you have some food with all the other Roman soldiers but the food looks like slop "yuck". When we do go to war we have to wear a big metal helmet and metal shoes and a hole metal suit and it is not very comfy at all but when someone trys to kill me I achally like the suit because it beteds me from gebing killed because the suit is metal. The worsted thing is the weather it is never warm like it is in Rome it always rains it's like rain, sun, funder storm and reapets all one again it is not fun. If you cant not tell by my writing I'm very very sad it is heartbreaking I never get to see you in person I can not even count how much years untill I can be free like you I will pray to see you again vale Ruby.

Writing home as a Roman soldier from Hadrian's wall.

PowerPoints made about Roman life.

Visiting the tennis club.

PIC•COLLAGE

Working with Sam Khogali the athlete.

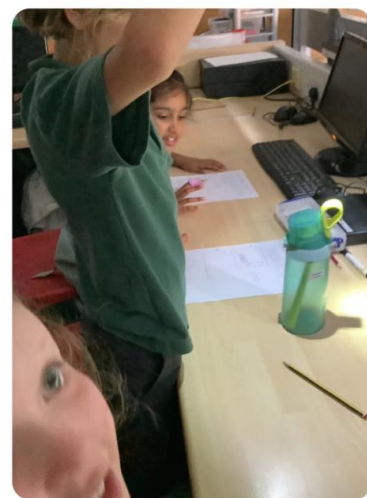

PIC•COLLAGE

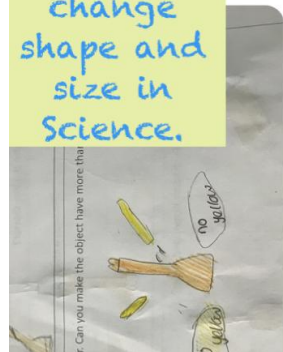

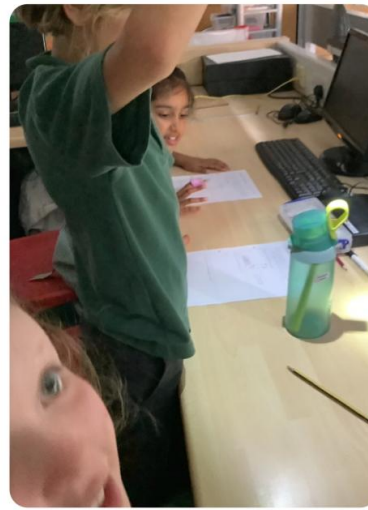

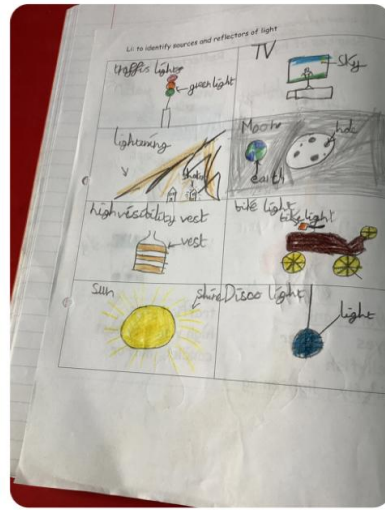

Making shadows in science

Making shadows change shape and size in science.

Making shadows change shape and size in science.
