

# A Governor stays late for BTSchool's first ever 'Space Camp' with visiting postgraduate researchers from Warwick University Physics Dept

On Friday January 27<sup>th</sup> the Year 5 children stayed very late at school until 11.00pm to watch stars, listen to astronomy experts , visit a huge inflatable planetarium and meet postgraduate students from Warwick University's Physics Department.

Greg Brown (2016 winner of the Warwick University awards for postgraduate teaching excellence) noted in particular how well the children responded to the session and how much they already knew about space.

Sean Rellis commented: "I was simply amazed by the Q and A session, every child had a question (all different) for the university students, I learnt more about the solar system in 20 minutes than I have in my whole life! Brilliant questions and answers and a simply wonderful extra for the Science curriculum."

**Sean Rellis visited to see our exciting curriculum and watched children learning Science from postgraduate astronomers.**
